

HOW TO CLAIM WORK-RELATED INTERNET USAGE

on your home internet

From your work calendar or diary, count and highlight the units of time your home internet was used for work purposes in the month

To work out your **claimable percentage** divide the amount of work-related internet time by the total internet usage time

Example:

*20 work-related hours / 50 total monthly hours = 0.4
(that's 40% of your monthly internet bill)*

Multiply internet bills paid in the financial year by your claimable percentage to work out your deduction

TIP:
KEEP AN EYE ON
CHANGES TO YOUR
USAGE DURING THE
YEAR — YOU MAY
NEED TO
RECALCULATE
YOUR DIARY
